Interview challenge

We'd love to see how you work when facing a little challenge.

Create a html page with js and css, which follows quidelines from the attached file. Expanders should work so, that only one is open at the time.

Please do not use any existing frameworks.

Bonus points:
- animations
    - o   expander content should slide in/out smoothly
    - o   opening arrows open/close state transition

Push your code to a public GitHub repository and send us a link.

Please send email, if you have any questions regarding to challenge.
